- a) Guest Speaker: College of Arts and Sciences Differential Tuition Requirement
 - Thank you for having us here
 - The college submitted a tuition change
 - After the month of consultation, we submit another revised consultation
 - Then it will be voted on later in November
 - The college of Arts and science is making an important decision and we wanted to share this with you all because it will impact so many students
 - To explain this policy, all students will be charged regular tuition that is used to cover all university activities
 - Differential tuition doesn't go into the pool instead directly to the college or school
 - We think this will improve student success
 - In the last year we have suffered the loss of many of our staff because they are getting better jobs offers.
 - We are still in the beginning of this process and we are talking to everyone in the program
 - We will have a survey to get students ideas and inputs
 - Questions:
 - Senator Byrne would this be charged to all students or just students in that major?
 - It will be charged to certain majors in the college of Arts and Sciences.

- Senator Briones how has the increase impacted the college of Arts and Sciences?
- We had to cut our budget. It could have been worse. If there is an increase in tuition, it goes straight to the pod and it is not specific to where it actually goes.
- Senator Aufrechtig what majors do you think this will impact?
- The one with the most credit hours and the one with the most students. Biology and psychology will probably be some of the first.

- Our budget is short because of Low enrollment rates
- We had a meeting with other schools and we are going to be working together for the lottery scholarship.
- Student fee review board is suffering because of the decreasing of enrollment
- Our options are either to raise student fees or cut a unit
- Senator Aufrechtig I know it is important to keep student tuition low But I think increasing the fees would be appropriate with the evolution of our school.
- Senator Hodge I think we have to be optimist and think that enrollment rates are going to go up. We can't cut some resources, that would only make people run the opposite way from us.

- Senator Briones how is it determined which unit gets cut?
